

CUSTOMER KNOWLEDGE / ENGLISH ONLY

RideRent Customer Help & Service Guide

A searchable question-and-answer source for the user-side RideRent assistant.

Scope: car rentals with a driver, fare estimates, booking requests, emergency ambulance requests, renter accounts, reviews, payments and support.

Coverage: general guidance only. Current vehicle prices, live availability, private booking status and an exact ambulance arrival time are not stored here.

Policy basis: RideRent project-owner answers supplied on 29 Sep 2026; user-side application reviewed against GitHub main commit 38311eb.

Find your answer

01 Getting started and account / 02 Vehicles and car booking / 03 Fare and distance / 04 Confirmation and changes / 05 Ambulance / 06 Payment and history / 07 Reviews / 08 Support / 09 Assistant boundaries

Read this document as customer guidance. A submitted request is not the same as a confirmed booking or a dispatched ambulance. For immediate emergency help in Bangladesh, call 999.

01 / Getting started and your account

For visitors and registered renters.

What is RideRent?

RideRent lets customers browse cars, request a car rental with a driver, and send emergency ambulance requests. It also provides a renter profile, booking history, a fare estimate for car trips, and customer reviews.

Can I browse vehicles and reviews before signing in?

Yes. The Vehicles and Reviews pages can be viewed without a renter account. To submit a car or ambulance request, sign in as a renter.

How do I create a renter account?

Open Sign Up and enter your name, a unique email address, a unique phone number, a password of at least eight characters, and the matching password confirmation. An address can be provided but is optional. New website registrations become renter accounts.

How do I sign in?

Open Login and enter the email address and password associated with your renter account. After signing in, you can use the booking forms and access your renter profile.

Where is my renter profile?

Open the Renter Profile after signing in. Personal Information shows your account details, and Rental Activity shows your vehicle and ambulance booking history.

Can I change my name, phone number or address?

Yes. In Renter Profile, open Personal Information, choose Edit profile, change the name, phone number or address, and save. The new phone number must not be assigned to another account. The email address is displayed but cannot be edited there.

Do I need an ID, a minimum age, or an advance payment just to request a ride?

RideRent currently states no additional ID-document, age-limit or advance-payment requirement for submitting a rental request. Contact RideRent if you need clarification for a particular trip.

Can I rent a vehicle to drive myself?

No. RideRent rentals are always provided with a driver. Self-drive rentals are not offered.

02 / Vehicles and car booking

Vehicle details and request submission.

How do I choose a vehicle?

Open Vehicles to browse models. The page shows current vehicle details such as name, brand, category, seating capacity, starting daily body rent and availability. Search, filters and sorting can help you find a suitable model.

Why can I not select a certain car?

A car model with no current available units cannot be selected in the booking form. Availability may change as bookings are confirmed or completed. Check the live vehicle list or choose another available model.

What information do I enter for a car booking?

On the home page Book Your Trip form, choose pickup district and thana, enter a pickup address, choose destination district and thana, enter a destination address, select an available car, trip type, future trip date and time, and trip duration. Review the fare estimate, then send the booking request.

Which trip types and durations can I request?

Trip type can be One Way or Round Trip. Available durations are 6 Hours, 12 Hours, 1 through 7 Days, or More Than 7 Days. For More Than 7 Days, enter a whole number from 8 to 365 days.

Can I schedule a trip in the past?

No. Select a current or future trip date and time. The booking form also needs a valid fare estimate before it can send the request.

Does sending a request confirm the ride immediately?

No. A successful submission saves the car booking request with Pending status. An administrator reviews it and contacts you about confirmation. A confirmed trip requires an available assigned driver.

03 / Estimated car fare and distance

All monetary examples are illustrative, not live quotes.

How is the estimated total car fare calculated?

Estimated total car fare = daily body rent multiplied by charged days, plus a route charge. The booking card displays the estimated breakdown before you send a request. Use the live booking form to get a quote for the car and route you selected.

How is body rent charged for a 6-hour or 12-hour trip?

The current fare calculator charges one day of body rent for 6 Hours, 12 Hours and 1 Day. For longer durations, it multiplies the vehicle daily rate by the selected number of days.

How is the route charge calculated between different thanas?

For different pickup and destination thanas, RideRent uses an approximate thana-to-thana distance and charges BDT 25 per estimated kilometer. A Round Trip includes the return distance in that kilometer total.

Does my exact street address change the distance quote?

No. The distance estimate uses the selected pickup and destination district/thana, not a street-address-to-street-address route. Your written addresses tell the team where to pick you up and drop you off. Actual road distance can differ.

What is the charge when pickup and destination are in the same thana?

For the same pickup and destination thana, the fixed local route charge is BDT 500 for One Way or BDT 750 for Round Trip. This is added to the body rent; it is not the entire trip fare.

How much does a round trip add?

For different thanas, both the outward and return estimated distance are charged at BDT 25 per kilometer. For the same thana, the route charge is a fixed BDT 750 for a round trip.

Does the body rent include the driver and fuel?

The body rent includes the driver cost, but not fuel cost. RideRent treats the kilometer-based route charge as the fuel-related part of an inter-thana trip; same-thana trips use the fixed local route charge.

Who pays tolls, ferries and parking?

The customer pays toll, ferry and parking charges separately. Those charges are not included in the displayed car fare estimate.

Is the previewed fare the final amount?

No. The booking card shows an estimate. The final amount may change slightly after the trip details are checked. Confirm the applicable amount and any extra costs with RideRent when the team contacts you.

Can the assistant quote today's price for a particular model?

No fixed model price is stored in this document. Vehicle rates and availability come from the live app. Open Vehicles and the booking card for the currently displayed rate and estimated total.

Can you show a sample fare calculation?

Illustration only: if a model is BDT 2,000 per day and the trip lasts 2 charged days, body rent is BDT 4,000. If two different thanas are estimated 40 km apart, a One Way route adds BDT 1,000, for an estimated BDT 5,000 before tolls, ferries or parking. A Round Trip on that example route charges 80 km, adding BDT 2,000, for an estimated BDT 6,000.

Can you show a same-thana example?

Illustration only: with BDT 2,000 body rent for one day, a same-thana One Way estimate is BDT 2,500; a same-thana Round Trip estimate is BDT 2,750. Any toll, ferry or parking cost remains separate.

04 / Confirmation, cancellations and changes

Use the phone contacts when your plans change.

When will I hear about a normal car booking request?

RideRent administrators generally try to reach the customer at the account phone number within about 15 to 30 minutes after a normal car booking request. This is an attempt-to-contact estimate, not a guaranteed confirmation time.

How will I know whether my normal booking is confirmed?

An administrator can tell you by phone, and you can check the booking status in Renter Profile under Rental Activity. Pending means the request awaits action; Confirmed means it has been accepted; Completed means the trip has finished; Cancelled means the booking was cancelled.

Can I cancel a booking myself on the website?

There is no customer self-service cancellation option in the RideRent user interface. Call a RideRent contact and ask an administrator to handle the request. Do not assume that a booking is cancelled until the team confirms it or the status changes.

How can I reschedule a car trip?

Contact an administrator. Where the existing booking can be removed, the team handles that old booking and asks you to send a new booking request with the desired date and trip details. If the old booking has payment history, it may need to be cancelled instead of deleted. The new request must be reviewed again.

What if I have already paid and want to cancel or change the date?

Contact an administrator before creating another request. A booking with a payment record may not be deletable; the team must handle the booking and payment record. This guide does not state a cancellation fee, refund amount or refund time - ask the team for the applicable decision.

What if I have not received a call?

Check that your profile phone number is correct and look at Rental Activity for the latest status. You can also call one of the published RideRent contacts. The 15 to 30 minute window describes a usual contact attempt, not a guaranteed response.

05 / Emergency ambulance requests

Urgent requests are coordinated by phone and the admin team.

Does RideRent accept ambulance requests across Bangladesh?

RideRent states that its ambulance request service covers all 64 districts of Bangladesh. The form provides district and thana selections. Dispatch still depends on coordination and availability for the specific request.

How do I request an ambulance?

Use the Emergency Ambulance Service form on the home page. Enter pickup district, thana and address; destination district, thana and address; and a reachable Bangladeshi emergency contact mobile number. Submit the form while signed in as a renter.

What number should I enter as the emergency contact?

Enter a reachable 11-digit Bangladeshi mobile number beginning with 013, 014, 015, 016, 017, 018 or 019. Keep the phone available because the administrator will try to contact you.

Does submitting the ambulance form mean an ambulance was dispatched?

No. The request initially has Pending status. An administrator tries to call as soon as possible, assigns an available ambulance driver and arranges urgent dispatch. The customer does not need to complete a second online confirmation step. Submission alone is not proof that a vehicle has left.

Is RideRent an emergency dispatch service?

RideRent accepts emergency ambulance requests and coordinates dispatch as quickly as possible after the team receives the request and arranges an available driver. No exact response or arrival time is promised in this guide.

How will I learn the ambulance fare?

The administrator explains the ambulance fare during the follow-up phone call. The car booking fare formula of BDT 25 per kilometer and same-thana fixed charges should not be applied to ambulance requests.

Where can I check my ambulance request?

Sign in and open Renter Profile, then Rental Activity and Ambulance Bookings. Status may be Pending, Confirmed, Completed or Cancelled. For urgent updates, call the RideRent contacts rather than relying only on the profile page.

How do I change or cancel an ambulance request?

Call RideRent support immediately with the request details. An administrator handles the ambulance booking status. The user interface does not provide self-service ambulance cancellation or rescheduling.

What should I do when someone needs immediate emergency assistance?

Do not rely only on an online request or wait for a profile update. In Bangladesh, call the National Emergency Service at 999 for immediate emergency help, and contact RideRent directly for your ambulance request. Source: Bangladesh National Portal, Emergency Hotline, <https://bangladesh.gov.bd/site/page/aaebba14-f52a-4a3d-98fd-a3f8b911d3d9/>

06 / Payment and your history

Payment timing is flexible; check your own records in the profile.

When do I pay for a car trip?

RideRent may take payment before the trip begins, during the trip or after it ends. Coordinate the amount and payment timing with the administrator who contacts you.

Can I pay online in the renter website?

This guide does not claim a renter checkout or online payment button. Ask the RideRent team which payment methods are currently accepted and how to pay for your booking.

Where do I see my booking and payment information?

Open Renter Profile and Rental Activity. Vehicle Bookings shows your reservations, dates, routes and status, with payment information when available. Completed Vehicle Trips shows payment details for completed car journeys. Ambulance Bookings shows ambulance requests and status.

What does Unpaid or Pending mean in my profile?

The profile may display Unpaid when no completed paid payment is recorded for that booking. A pending booking means an administrator has not confirmed it yet. For a discrepancy in amount or payment status, contact RideRent with your booking details.

What is the refund policy?

A universal refund amount or timeline was not supplied for this guide. If you have paid and need to cancel, call RideRent so the administrator can review your booking and payment record.

07 / Customer reviews

Reviews are public; submitting one requires an eligible renter account.

Can anyone read customer reviews?

Yes. Open the public Reviews page to read reviews without signing in.

When can I write a review?

Sign in as a renter and complete at least one car or ambulance booking. Once that completed trip appears in your records, the Reviews page can allow you to submit a review.

What can I submit in a review?

Choose a rating from 1 to 5 stars and write a non-empty comment of no more than 1,000 characters.

Can I post several reviews?

The current system accepts one review per renter account. The Reviews page will say when you have already submitted one.

Can an admin submit a customer review?

No. Administrators can read reviews but cannot submit them as customers.

08 / RideRent contact numbers

The project owner approved the following names and numbers for public customer support.

Who can I call about a booking, cancellation, fare or ambulance request?

You can call Shadab Arshad at +8801711159101, Syed Raiyan Newaz at +8801795585875, Kaushik Sarker at +8801577027715, or Kazi Ahnaf Islam at +8801625044420. These are the numbers displayed in the RideRent Contact section.

What is Shadab Arshad's RideRent contact number?

Call Shadab Arshad at +8801711159101 for RideRent support.

What is Syed Raiyan Newaz's RideRent contact number?

Call Syed Raiyan Newaz at +8801795585875 for RideRent support.

What is Kaushik Sarker's RideRent contact number?

Call Kaushik Sarker at +8801577027715 for RideRent support.

What is Kazi Ahnaf Islam's RideRent contact number?

Call Kazi Ahnaf Islam at +8801625044420 for RideRent support.

Are support hours, an email address or a walk-in address confirmed?

No support hours, general support email or walk-in office address were confirmed for this knowledge base. Use the published phone contacts; do not assume round-the-clock telephone staffing.

09 / Assistant answer boundaries

These rules describe the intended user-side assistant behavior; application code must enforce them.

What topics may the RideRent assistant answer?

Only RideRent customer topics: renter accounts, vehicles, car booking requests, estimated fares, ambulance requests, booking changes, payments, reviews and published support contacts. It should decline unrelated questions.

What if a customer writes in a language other than English?

The intended chatbot response is: "Please ask your question in English." It should not answer the substantive question in another language. This language check must be implemented in chatbot code; a PDF alone cannot enforce it.

What if a customer asks an off-topic question?

The intended chatbot response is: "I can only help with RideRent services, bookings, fares, ambulance requests, accounts, reviews, and support." Topic checking must be implemented in chatbot code.

Can the assistant tell me my personal booking status or exact arrival time?

No private account or live dispatch data is supplied by this static document. For personal status, sign in to Renter Profile or call RideRent. The assistant must not invent a confirmation, assigned driver or ambulance arrival time.

What if the answer is not covered by RideRent information?

Say that the information is not confirmed and direct the customer to the published RideRent contacts. Do not invent policies, guarantees, payment methods, exact vehicle prices or refund times.

Should I share my password or payment secret in chat?

No. Never send a password, one-time code or payment secret in a chatbot conversation. Use the app for account actions and contact RideRent directly for booking or payment questions.

Maintenance note: Update this PDF whenever RideRent changes booking rules, fare rates, contact numbers, emergency workflow, payment policy or user-facing screens. Rebuild the chatbot index after replacing the document.

Information basis: owner-supplied customer policy (29 Sep 2026); RideRent frontend and Laravel source at main commit 38311eb; Bangladesh National Portal emergency hotline reference for 999.
